[case](#) [foldable](#)

Sturdy version of <http://www.thingiverse.com/thing:779159> .

Walls thicker.

Battery compartment for 8x AA batteries (lasts longer then a 9v cell, use rechargeable batteries to not exceed the 12v max).

Foldable legs.

Reset button is flush with case to minimize mistakes.

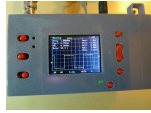

On/off switch.

Don't forget support for the battery compartment.

The battery compartment could probably be remixed in to a storage compartment for the cables instead (with a lipo setup).
